

1. (Two Times Amended) A battery comprising a battery body including:  
a positive and a negative electrode containing an active material,  
an electrolytic solution containing an electrolyte, and  
an adhesive resin layer which is interposed in between the positive electrode and the  
negative electrode and is joined directly to both of the positive and the negative electrodes,  
wherein

the adhesive resin layer consists of one layer and contains an adhesive resin and a  
filler.

2. (Amended) A battery according to claim 1, wherein the electrolyte is an organic  
electrolyte containing lithium ions.

3. (Amended) A battery according to claim 1, wherein an average particle size of the  
filler is equal to or smaller than a particle size of the active material constituting each  
electrode.

4. (Amended) A battery according to claim 1, wherein an average particle size of the  
filler is 1  $\mu\text{m}$  or smaller.

5. (Amended) A battery according to claim 1, wherein the sum of a volume ratio of  
the adhesive resin and that of the filler per unit volume of the adhesive resin layer is less than  
1.

6. (Amended) A battery according to claim 1, wherein the sum of a volume ratio of  
the adhesive resin and that of the filler per unit volume of the adhesive resin layer is 0.2 to  
0.8.

7. (Amended) A battery according to claim 1, wherein the filler comprises at least  
one of non-conductive materials and semiconductors.

8. (Amended) A battery comprising a battery body including:  
a positive and a negative electrode containing an active material,  
an electrolytic solution containing an electrolyte, and  
an adhesive resin layer which is interposed in between the positive electrode and the  
negative electrode and is joined directly to both of the positive and the negative electrodes,  
wherein

the adhesive resin layer comprises at least one layer and contains fillers; and  
the adhesive resin layer comprises a layer containing an electrically conductive filler  
and a layer containing at least one of non-conductive fillers and semiconductive fillers.

9. (Amended) A battery according to claim 1, wherein the adhesive layer is  
constituted so as to fill the unevenness of the positive electrode and the negative electrode.

10. (Amended) A battery according to claim 1, wherein the battery body is a laminate  
of a plurality of electrode bodies each consisting of the positive electrode, the adhesive resin  
layer, and the negative electrode.

11. (Amended) A battery according to claim 10, wherein  
the laminate of a plurality of electrode bodies comprises a plurality of positive  
electrodes, a plurality of negative electrodes and a plurality of adhesive resin layers; and  
the plurality of positive electrodes and the plurality of negative electrodes are  
interposed alternately among the plurality of adhesive resin layers.
